## Senior Data Solutions Manager - onsite (m/f/d)

Hamburg

Full-time  
employee

Professional/Experienced

70 - 90 K

4,1

Apply

### Your tasks:

- Own requirements engineering with Product, Analytics, and Data Science, translating business goals into technical specifications.
- Ensure consistency and evolution of tracking data schemas in close collaboration with analysts and product teams and drive holistic data quality assurance.
- Lead the end-to-end tracking implementation process and act as the main contact for engineers and product owners.
- Manage Adobe Analytics administration and enable colleagues through self-service support.

### Your skills:

- A Bachelor's degree in Business Administration, Computer Science, Statistics or a similar field.
- 5+ years of professional experience in managing data analytics platforms such as Adobe Analytics. Snowplow is a plus.
- Strong analytical and conceptual thinking in order to translate business demands into technical concepts.

- The ability to interpret complex data sets and explain corresponding processes and insights in a simple and understandable way.
- Technical understanding of infrastructure and architecture to discuss technical approaches with Engineers.
- Proficiency in data manipulation and analysis using tools such as SQL. Adobe Analytics Workspace is a plus.
- Excellent communication skills in English, especially on a business and tech level.
