Senior Software Engineer (f/m/x)

Barcelona

Full-time employee

Professional/Experienced

45 - 62 K

4,1

Apply

Your tasks:

- Design and develop advanced, sustainable solutions within our agile product engineering team, focusing on our monolithic architecture.

- Engage in the full software development life cycle from concept to deployment, ensuring high-quality deliverables.

- Work collaboratively to create and refine features, while troubleshooting and resolving performance issues.

- Play a key role in maintaining and improving code quality, organization, and automation.

- Embrace the dynamic, cross-functional work environment, communicating effectively in English (no German required).

Your skills:

- Solid background in software engineering, with a specialization in PHP and experience with MVC frameworks (Symfony preferred).

- Proficient in relational databases (MySQL/MariaDB) and familiar with Elasticsearch and Redis.

- A strong advocate for automated testing, clean

code, and thorough code coverage.

- Agile enthusiast with a passion for teamwork and knowledge sharing.

- A positive, solution-oriented mindset, strong English communication skills, and an openness to a diverse working culture.
