It's all about people. Let's design products they love.

Backend Engineer Data & Compliance (m/f/x)

Hamburg	Full-time employee	Professional/Experienced
70.000-80.000	4,4	

You can look forward to (tasks):

- Design and maintain data applications that handle millions of requests each day
- Observe current trends in the data & AI world
- Work closely with data engineers, data scientist and analysts to support the implementation of data-driven features and services.
- Bring in your knowledge and experience to make an impact on our products and the technical architecture.
- Learn and work with big data technologies such as Node.js, Scala, Kafka, Kubernetes, and Snowflake.
- Live the complete development cycle, including task breakdown, coding, writing unit tests, participating in code reviews and performing deployments.

Your skills:

- A Bachelor's or higher degree in Computer Science or in a similar field.
- Strong programming skills in Node.js and Ruby on Rails.
- Good Knowledge in SQL.
- A strong interest in working with large data sets.
- Ability and motivation to write clean code and

refactor apps.

- Testing (Unit Testing and End to End for instance with Jest).
- Experience with big data technologies such as Kafka and Hive.
- Hands-on experience on AWS and Kubernetes as developer.
- Proficient communication skills in English, especially on a technical level.
- A good sense of humor and a positive mindset, even in challenging situations.
