**It's all about people.
Let's design products
they love.**

Cloud Database Engineer

	Hamburg		Full-time employee		Professional/Experienced
	65 - 85 K		4,4		

Your tasks:

- Run, optimise, automate and monitor our wide range of database clusters in AWS
- Contribute to the technical design and implementation of a central cloud database service.
- You ensure scalability and efficiency of our infrastructure with modern tools and standards.
- Migrate MySQL galera systems from on-premises to the public cloud.
- Use technologies like AWS Aurora, MySQL, Galera and Terraform.
- Support teams with the integration of database services into our platform.
- Participate in our 24/7 on-call rotation.

Your skills:

- In-depth relational database services skills
- Expert experience in AWS cloud database services
- Working knowledge of Linux operations, including automation, troubleshooting and monitoring
- Focused on tooling, automation, configuration management tools and infrastructure-as-code frameworks are your daily tools (Python, Crossplane, Terraform... or any other IAC Tools)

- Proficient English language skills
