Team Lead Security (m/f/d)

⌖ Hamburg	◍ Full-time employee	⌐ Professional/Experienced
▭ 100 - 120 K	k 4,1	

Apply

Your tasks:

- lead a small team of security engineers and incident responders

- You and your team are the first point of contact at XING for security-related questions.

- advise teams during new projects, help them understand risks and suggest mitigations.

- manage software vulnerabilities and assist our teams in handling them.

- play a key role in security audits.

- set up monitoring processes to help detect attacks.

- manage incidents that could affect security.

- draft security-related processes, policies, requirements and guidelines.

Your skills:

- You've received training or a degree in IT, software development or similar, and have several years of security experience.

- Your analysis is thorough, and your advice is clear, practical, and understandable for people with

technical and non-technical background.

- You're well connected within the security community.

- You understand code and ideally have some background in system administration.

- You write policies to combine risk management and business needs to ensure a compliant, safe and productive work environment

- Ideally, you are holding a recognised security certificate, e.g. CISSP .

- If you are familiar with Microsoft Azure, Entra ID, Defender Suite, XSIAM and related security configurations and management, that would be a plus.

- Proven network or application security skills would also be a bonus.

- Fluency in English and German is required.
