We need you.

Data Engineer (m/f/d)

Vienna

Full-time employee

Professional/Experienced

45 - 67 K

4,2

Apply

Your tasks:

- Maintaining the kununu DWH and it's various data integrations.

- Enabling Business Analytics in building their reporting structures.

- Enabling Data Scientists to integrate their creations and ideas into the kununu platform.

- Supporting kununu feature teams in building and maintaining efficient data systems.

- Helping stakeholders in kununu and NW with data requests beyond BA's capabilities.

Your skills:

- Good experience with Python, software engineering concepts, algorithms, data structures and best practices.

- Hands-on knowledge of databases and DWH solutions, as well as SQL.

- Experience with Infrastructure as Code and one of the big cloud providers (preferably Google Cloud).

- A good track record of successful ETL/ELT projects ,as well as building solutions to manipulate data

between multiple sources.

- Automated testing, clean code and code coverage is just as important to you as production code.

- Great English communication skills.
