

We need you.

Backend Engineer PHP (m/f/x)

Vienna

Full-time
employee

Professional/Experienced

60 - 70 K

4,2

Apply

Your tasks:

- Design, test, build, ship and maintain efficient, reusable, and reliable object-oriented PHP8 code;
- Take ownership of frontend tasks when required, including developing React;
- You provide and enhance tools to automate processes and ultimately improve our development environment;
- Ensure the best possible performance, quality, and responsiveness of the applications;
- Identify bottlenecks and bugs, and devise solutions to these problems;
- Help maintain code quality, organization, and automatization;
- You have the great opportunity to work in an international, cross-functional environment (communicating in English, German is not required).

Your skills:

- Strong object-oriented PHP skills, experience with MVC frameworks (Symfony is a plus)

- Experience in designing, building, testing and shipping web applications
- Automated testing, clean code and code coverage is just as important to you as production code
- Exceptional experience with various design and architectural patterns, algorithms, and data structures (experience with microservices is valued)
- You're into agile methodologies and enjoy working in teams with a focus on sharing knowledge
- DevOps mentality and result-oriented experience with MySQL and Linux administration is of advantage
- Experience with Elasticsearch/SOLR/Lucene is a plus
- Great English communication skills.
- Nice to have: some working experience with React
