Apply

Your tasks:

- Own and evolve the kununu DWH and its various data integrations end-to-end.
- Lead and support initiatives to extend our data platform capabilities and enable other departments and external partners in their day-to-day work.
- Set standards for data quality, performance, and governance. Identify and resolve data bottlenecks and inefficiencies.
- Work closely with your fellow Data Engineers, Data Scientists and Business Analysts to deliver robust and innovative products.

Your skills:

- Extensive experience with Python, software engineering concepts, algorithms, data structures and best practices.
- Hands-on knowledge of databases and DWH solutions, SQL and ideally dbt.
- In-depth experience with Infrastructure as Code

(Terraform) and at least one of the big cloud providers (preferably Google Cloud).

- A track record of successful ETL projects.
- Automation and testing is just as important to you as production code.
- Great English communication skills.
